OUR JOURNEY

WE ARE PIONEERS IN STONE MINING AND PROCESSING.

As an exporter of close to 1000 containers annually, RSG Stones is a leading stone mining and processing company in India.

WE LOVE WHAT WE DO.

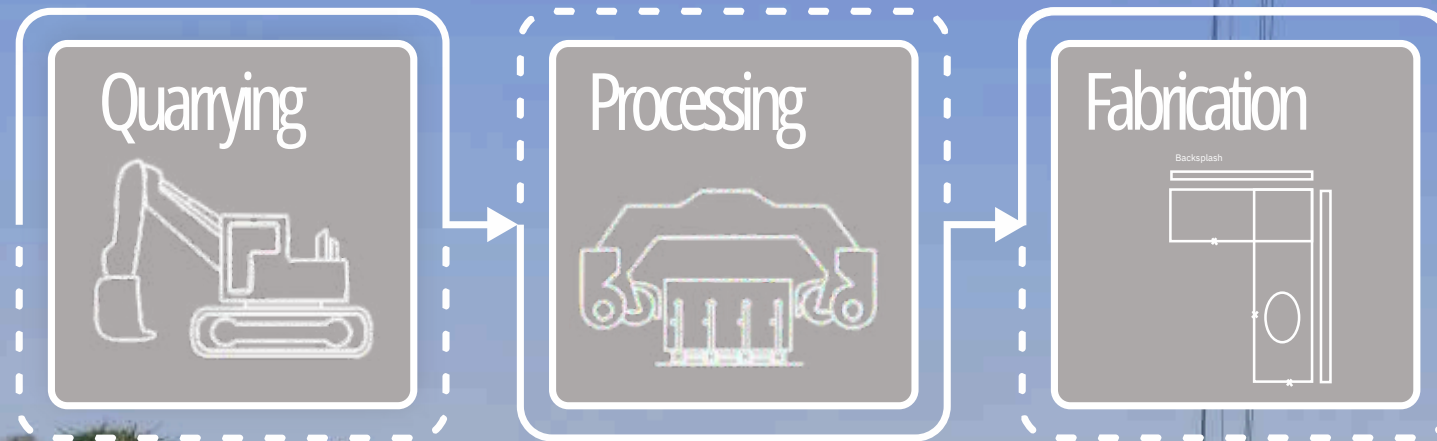

Stellar Stones & RSG Stones has operated successfully in the Stone Industry for over a quarter of a century, bringing you the world's finest stone products and solutions. We are pioneers in marble and quartzite mining in Rajasthan, India.

Our journey began with quarrying exquisite marble from India's famed mines and subsequently expanded our portfolio to virgin Rainforest Green and Brown Marble. This transformation turned out to be our moment of epiphany – In only a short span of time, our products received global recognition and we turned from just another company to the biggest suppliers of Rainforest Marble in the world.

Discovery and delivery of new stones has become our forte. Stellar Stones & RSG Stones is now a leading exporter of Indian Marble, Granite and Quartzite. We possess 100+ luxurious stones in our portfolio today. Our expertise in mining is complemented with advanced processing capability, with fully automated processing centres driven by Italian machinery that allows us to offer the highest quality of stones to more than 30 countries, with strong leadership in the US, Chinese, European and South American markets. Our latest venture is quarrying the First Quartzite of India - Maharajah.

WE INNOVATE TOO!

Stellar Stones & RSG Stones has consistently created new and innovative products, always pushing the limits of design and functionality to deliver the best-in-class products. In fact, innovation is a key ethos of our company; our knowledge and agility has helped us build an international reputation. Timely delivery, reasonable pricing and quality products have actually helped in our journey of turning our customers into advocates.
